

Design a Student registration form for KIIT central library using HTML text formatting tags, and including the following components in order:

- 1) KIIT Central Library in the middle of the form and present on the top
- 2) A "Student Registration Form" message moving from right to left constantly with its background image as green
- 3) Next, group all the below related information by inserting a legend by name of "Student Details":
  - Under the legend:
    - a) Ask for student name, with three field names namely: First Name, Middle Name, and Last Name
      - Each of the above should be followed by corresponding textboxes for the student to enter
    - b) Ask for the student's email with the field name "Email" followed by a textbox for the student to enter into it
    - c) Ask for the student's password with the field name "Password" followed by a textbox for the student to enter into it
    - d) Next, again ask the student to enter their password for confirmation by using a field "Confirm your password" followed by a                      textbox for the student to enter into it for confirmation
    - e) Ask for the student to fill their gender by using a field name "Gender" followed by providing three radio buttons bearings:                      Male, Female, and Others
    - f) Ask the student to fill their addresses:
      - i) First ask for the correspondence address using field "Enter your Correspondence Address" followed by multi-line input textbox
      - ii) Repeat the above, but this time with field name "Enter your permanent Address" followed by multi-line input textbox
    - g) Ask the student to enter their Domicile State with field: "Domicile" followed by choosing from one of the following options:
      - i) Odisha ii) West Bengal iii) Jharkhand iv) Bihar V) Uttar Pradesh vi) Andhra Pradesh vii) Telengana
    - h) Finally, ask the student to submit the details by designing a submit button with value "Sign up"

Now, I) Field names need to formatted using appropriate TextFormatting Tags  
II) The legend names should be in bold font  
III) Use appropriate Headers depending upon what stage you are applying it
